

Learning Into Our Values

During Times of Uncertainty

Support agency, voice, & choice

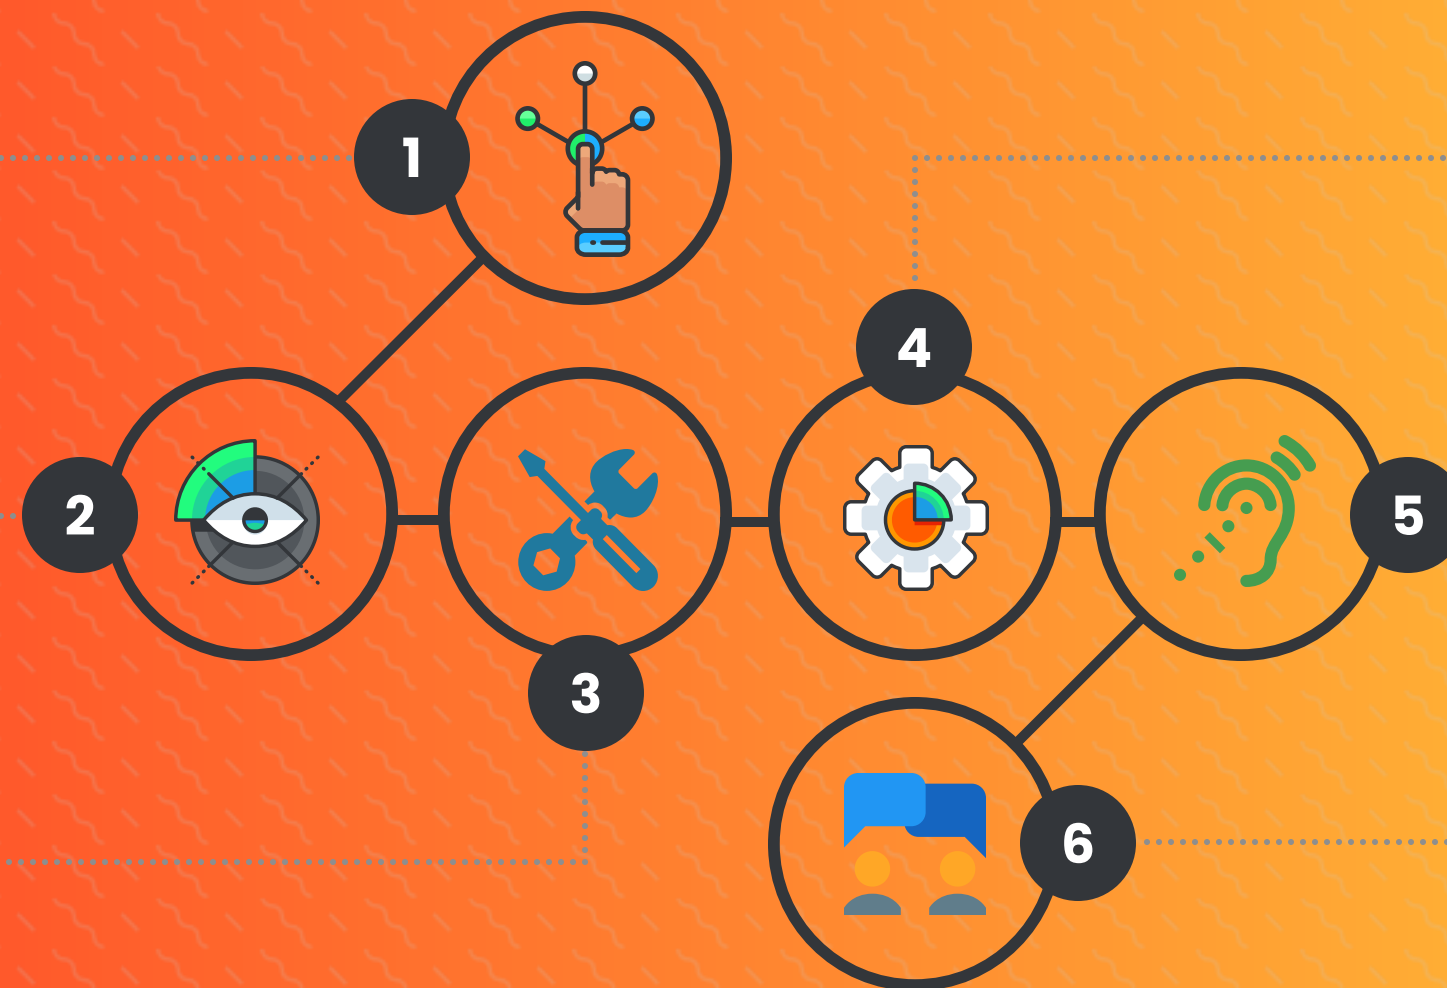

- Balance content with student initiative
- Allow students to surprise you
- Value what students bring to the learning

Keep the focus on the Learning

- Learning is a product of thinking
- Don't mistake work for learning
- Locate the learning for students
- Assess the learning not the work

Make Use of Learning Frames, Structures & Routines

- Scaffold interactions & thinking
- Split screen teaching
- Teach students how to learn & think

Narrow, pare down, & focus the curriculum

- You can't teach it all...you could never teach it all.
- Focus on the big ideas with legs
- Prioritize depth over coverage

Learn how to listen...all over again

- Show a vigorous interest
- Listen, document, feed-forward
- Plan for listening occasions

Promote discussion, dialogue & interaction

- Follow the 10-minute rule
- Set a purpose for discussion
- Prepare students for discussion
- Help students connect
